

WHAT ARE YOUR VIEWS ON THE CURRENT POLITICAL SCENARIO IN AFGHANISTAN?

Afghanistan is in central Asia with Pakistan on the east and Iran on the west. The terrain mostly consists of deserts and mountains. It is majorly occupied with the Islamic community due to invasions of Islamic kings. This country is highly prone to terrorist attacks and has an unstable political scenario. By hearing about the country, the first thing that comes into our mind is the Taliban.

Taliban is the name of a movement that originated to establish Islamic law in Afghanistan and Pakistan started by religious students. But it turned into terrorist troops killing the civilians who oppose their thought. They are the reason for the 9/11 attacks. In answer to this US sent their troops in 2001 to the Afghan to demolish the terrorism and their bases. By which they have left and hid in the Pakistan borders.

Even under the help of Soviet troops, the political scenario in Afghan's political scenario is not stable and some provinces were being held by the Taliban. Afghanistan has a very low human development index of 0.51 and ranked 169 out of 189 countries even before the Taliban got total control. This made the Taliban even powerful and to wait for the Soviet troops to leave.

When the Soviet troops left the country in august 2021, the Taliban has started again to occupy the whole region. The Afghan military force wasn't sufficient to stop the Taliban. They occupied the country within weeks. They started to enforce their Islamic law.

The Taliban leader forces everybody to follow Islamic. If anybody revolts against him then he will be killed. Many tribal leaders and municipal representatives felt that they will lose their help from the central government and were easily forced by the Taliban to hand over their district.

The Taliban has started their evil rule. They started killing the people against them. They are implementing very harsh rules and many restrictions on women. People of the country are living in fear and waiting for help with faith. Over 85% of citizens are against the Taliban's rule. People are facing a very harsh situation.

Finally, everybody knows that the Taliban will take over when US troops leave. But no one has stopped that or suggested a better solution. Now, every country is in fear to interfere with these matters of Taliban rule reminding the 9/11 attacks. The decision of the US to withdraw the military ruined a country.
